

Dear Sir or Madam,

this year we are celebrating the 20th anniversary of the Dermatology Section Workshops of PSAVA. The meeting takes place once again in Ustroń, where the very first workshop was held. As every year, the event begins with Friday pre-conference practical workshops, including ear cytology and ultrasound of the neck region in dogs, with special attention to the thyroid gland and lymph nodes. Although these topics may seem only loosely connected to dermatology, they are highly relevant in everyday clinical practice.

The main conference will feature two outstanding European veterinary dermatologists, Professor Ralf S. Mueller and Professor Thierry Olivry. This year's workshops will focus entirely on canine atopic dermatitis, with an emphasis on modern approaches to diagnosis and treatment.

The lectures of the main conference are held in English and are simultaneously interpreted into Polish. The practical workshops are conducted in Polish.

Dr. Zbigniew Blimke
Dermatology Section of PSAVA
